

LIMOVİ – Gold Ecosystem Private Limited

Redefining Gold: From a Dead Asset to a Living Ecosystem

India's first 360° gold asset ecosystem.

We make gold work for you.

THE PROBLEM :

Gold is a "Dead Asset" for 90% of Indian Households.

- 1• **Idleness:** \$1.3 Trillion worth of gold is kept in lockers, providing no utility beyond price appreciation.
- 2• **The Jewellery Paradox:** Buying new jewellery for every occasion is expensive (making charges, wastage, and GST), leading to high "cost-per-wear."
- 3• **Liquidity Friction:** Taking a gold loan or selling gold is still a slow, manual, and often stigmatised process.

THE SOLUTION :

A Full Stack Gold Ecosystem that digitises physical assets (coins, bars, jewellery) or cash into a live, highly fluid dashboard.

- **Storage to Utility:** We get gold into utility and give the customer a digital dashboard to manage their wealth.
- **The Jewellery Cloud:** Instead of buying one necklace set, users use their gold balance to "stream" unlimited jewellery designs delivered to their door. (**festive + lifestyle subscriptions**)
- **Instant Financial Rail:** One click loans and liquidity against the gold balance, bypassing Social Friction.
- **Wealth Generation:** Turning personal jewellery into an everyday yield generating asset.

SECURITY & COMPLIANCE :

1. Digital Gold Balances

- **Primary Regulators:** SEBI and the Financial Intelligence Unit (FIU-IND).
- **Key Regulations:**
 - ~**SEBI (Vault Managers) Regulations, 2021:** Asset representation must be mapped to physical gold through a SEBI-registered Vault Manager.
 - ~**Prevention of Money Laundering Act (PMLA), 2002:** Gold platforms are treated as "Reporting Entities." LIMOV enforce **strict, automated KYC and AML procedures** (PAN/Aadhaar verification via India Stack) for every enrolment to mitigate major cash to gold.
- **Compliance Strategy:** The tokenisation process is verified and protected by an **independent SEBI registered Security Trustee** who legally acts on behalf of the consumers.

2. Secure Custodial Storage

- **Primary Regulator:** Bureau of Indian Standards (BIS) & Ministry of Consumer Affairs.
- **Compliance Framework:**
 - ~**BIS Hallmarking Regulations:** Any physical jewellery handled is verified through certified Assaying and Hallmarking Centres (AHCs) to legally confirm purity (karatage) and weight before vaulting.
 - ~**The Banning of Unregulated Deposit Schemes (BUDS) Act, 2019**
- **Operational Requirement:** LIMOV partners with **SEBI-registered Vault Managers** or internationally recognised, secure vaulting agencies (e.g., Sequel Logistics, Brink's). The custody is overseen by a **SEBI-registered Independent Security Trustee** to protect consumer ownership.

3. The Jewellery Cloud

Operating a peer to peer or platform managed physical marketplace for circulating actual jewellery designs involves traditional commercial custody and e-commerce consumer laws.

- **Primary Regulators:** Bureau of Indian Standards (BIS) and Ministry of Consumer Affairs.
- **Key Regulations:**
 - ~**BIS Hallmarking Regulations:** Before any customer jewellery is stored and offered to another user as part of the "Jewellery Cloud" streaming service, it must pass through a certified Assaying and Hallmarking Centre (AHC) to legally confirm its precise purity (karatage) and eliminate fractional fraud.
 - ~**The Indian Contract Act, 1872 (Bailment Laws):** Storing and renting out jewellery is legally structured as **Bailment** (temporary transfer of possession without transfer of ownership). The platform must utilise ironclad, digital Bailment Agreements defining exact customer liability for damage, loss, or counterfeiting during transit and use.
 - ~**Consumer Protection (E-Commerce) Rules, 2020:** Requires explicit, unalterable display of rental terms, return conditions, and dynamic grievance procedures.
- **Compliance Strategy:** Requires specialised **Block Insurance Policies** (all risk coverage for high value transiting assets) to cover physical theft or switch scams while the jewellery is away from corporate custody.

4. Wealth Generation

- **Primary Regulators:** SEBI, Ministry of Corporate Affairs (MCA), and Income Tax Department.
- **Key Regulations:**
 - ~**SEBI (Collective Investment Schemes) Regulations, 1999**
 - ~**The Banning of Unregulated Deposit Schemes (BUDS) Act, 2019:** Private businesses are strictly prohibited from soliciting public assets under schemes unless registered with a central regulator.
 - ~**Income Tax Act, 1961 (TDS Controls):** These payouts are taxable "Income from Other Sources."
- **Compliance Strategy:** To completely bypass CIS violations, LIMOV structure the 35% payout as a **direct commercial rental dividend or platform royalty fee** mapped strictly to that specific user's distinct, serialised asset ledger. Payouts are unpooled, fully transparent, and subjected to **Tax Deducted at Source (TDS)** mandates before electronic distribution.

5. Gold Balance-Backed Loans

- **Primary Regulator:** Reserve Bank of India (RBI).
- **Key Regulations:**
 - ~**RBI Master Direction for Non-Banking Financial Companies (NBFCs):** The platform adhere to standard **Loan-to-Value (LTV) ratios**.
 - ~**RBI Digital Lending Guidelines (DLG):** Because the loan trigger is app based, LIMOV act as a **Digital Lending Application (DLA)**. Funds move directly from a regulated bank account to the user's account.
- **Compliance Strategy:** LIMOV executes through a partnership model with **RBI-regulated NBFC partner acts as the primary lending rail** while LIMOV app serves as the originating front-end interface.

6. Instant Liquidity on Gold Balances

- **Primary Regulators:** RBI and the National Payments Corporation of India (NPCI).
- **Key Regulations:**
 - ~**Payment and Settlement Systems Act, 2007**
 - ~**Central Goods and Services Tax (GST) Act, 2017**
- **Compliance Strategy:** LIMOV partners directly into institutional, certified payment gateways (e.g., Razorpay, Cash free) connected via secure IMPS/UPI banking APIs. The liquidation cash value is tied to transparent, live, unmanipulated wholesale spot prices (such as the MCX spot rates) to ensure complete audit compliance.

7. Gift a happiness

Requires alignment with inheritance and property laws.

- **Primary Jurisdiction:** Indian Succession Act, 1925 & Income Tax Department.
- **Key Regulations:**
 - ~**Indian Succession Act, 1925:** To allow zero-cost generational transfers without legal delays, the platform enforce strict, mandatory **Nomination Frameworks** at the time of user onboarding.
 - ~**Know Your Customer (KYC) Lifecycle Updates:** The nominee must undergo complete PAN/Aadhaar KYC verification and identity validation before the account privileges are officially updated.

- **Compliance Strategy:** The digital balance is governed by a **Trust Deed** managed by partner Security Trustee. This ensures that when ownership transfers, it is recognised as a legal asset succession rather, preventing issues regarding tax evasion or hidden asset transfers.

TRACTION :

MARKET (TAM) :

-Total Addressable Market (TAM): India holds ~25,000 tonnes of private gold. Total value > \$1.3 Trillion.

-Serviceable Addressable Market (SAM): The organised gold loan market (\$60B) + The Indian jewellery retail market (\$80B).

-Target: The Indian Middle & Upper-Middle class who view gold as both an investment and a social necessity. The growing demographic of "Asset Light" millennials and Gen Z who prefer "access over ownership."

WHY NOW ? :

1. **Macro Asset Pressure:** Gold prices are hovering at all-time highs, making frequent upfront purchases of diverse physical jewellery designs economically prohibitive for middle class consumers
2. **Digital Infrastructure:** UPI and Aadhaar enable instant KYC and 5 minute loan disbursements.
3. **Gen Z/Millennial Shift:** The younger generation prefers "Access" over "Ownership" but still trusts Gold as an asset.

THE INSIGHT :

"Gold shouldn't just sit in a locker; it should pay rent."

- **Gold as Membership Capital:** Traditional players treat gold as a commodity to sell. LIMOV treats it as capital. A one-time 20% membership fee unlocks lifetime luxury jewellery streaming, creating a high margin, sticky ecosystem where customers never have to liquidate their wealth.

- **The Circular Gold Dividend:** Jewellers profit only on sales; banks profit only on loans. LIMOV creates a circular economy. Our "Jewellery as an Asset" model **pays gold owners 35% of every experience charge generated**, turning a passive ornament into a dividend paying asset.

- **De-Stigmatised 1 Click Liquidity:** We eliminate the heavy social stigma and friction of physical gold loan counters. By integrating a 1 click digital rail directly into bank accounts within 5 minutes, we win on asset velocity and immediate physical utility.

BUSINESS MODEL :

We monetise through experience charges, service fee, membership and interest:

- **Membership charges:** 20% one time charge for "Lifetime Experience" (Free jewellery experience for 50g+ investors). (INVESTMENT & EXPERIENCE Strategy)
- **Experience charges:** ₹1,399 per 10gram gold experience + ₹999 service charge (ENROL & EXPERIENCE, INVESTMENT ONLY AND EXPERIENCE ONLY strategy)
- **Lending:** 12-14% APR on gold-backed loans. (CUSTOMERS OF ALL STRATEGIES)
- **Liquidity:** 0.5-1% transaction fee on instant cash outs. (CUSTOMERS OF ALL STRATEGIES)
- **Yield:** Optimisation of stored gold assets through institutional partnerships.
- **Wealth Generation:** Turning personal jewellery into a yield generating asset. (ENROL & EXPERIENCE AND INVESTMENT & EXPERIENCE STRATEGIES)

COMPETITION :

- **Traditional Banks/NBFCs:** Provide loans but offer zero "experience" or utility for the gold.
- **Traditional Jewellers (Tanishq, Malabar):** They want you to buy and keep. We offer variety and instant liquidity.
- **Gold Loan Apps (Rupeek, Muthoot):** They are purely transactional. They don't offer the "Jewellery Experience" or lifestyle utility.
- **Digital Gold (Jar, SafeGold):** They are purely for savings. They lack the physical "Experience" component.
- **L I M O V I Advantage:** The only platform combining **Investment + Experience + Liquidity** in one ID.

THE ASK :

"To scale the LIMOV I vision safely and strategically, I request following support.

- **Infrastructure Alliances:** Establishing introductions and secure integrations with licensed, compliant custodians, asset trustees, and RBI-regulated NBFC partners.
- **Regulatory & Legal Mentorship:** Collaborating with fintech and bullion trade legal experts to refine our asset tokenisation framework within the RBI sandbox parameters.
- **Technical support:** in building a robust application.

Our goal is to build an unassailable, compliant gold utility ecosystem that transforms passive household wealth into a secure, dynamic engine of financial and lifestyle utility."
